

# Collin Makohon

## Senior Software Engineer

Charlotte, NC • 704-773-6969 • cmakohon@me.com

---

### PROFESSIONAL SUMMARY

Senior software engineer with 9 years of experience delivering enterprise-grade applications across financial services and retail. Proven leader with a track record of guiding engineering teams, influencing technical direction, and taking full ownership from requirement clarification through production. Combines strong UI craft with systems-level thinking, and a history of elevating teams through mentorship, cross-functional collaboration, and practical adoption of emerging technologies.

---

### SKILLS

**Frontend:** React, Redux, Vite, Next.js, TypeScript, JavaScript, Angular, Tailwind CSS, HTML, CSS

**Backend:** Node.js, Express.js, Java, Spring Boot, REST APIs, SQL, PostgreSQL, Oracle Database

**DevOps & Infrastructure:** Docker, Kubernetes, OpenShift, Jenkins, GitHub Actions, CI/CD, Unix

**Tools:** Git, GitHub, GitHub Copilot, VSCode, IntelliJ, Windsurf, Claude Code

**Agentic Engineering:** AI-assisted development workflows, MCP (Model Context Protocol) integrations, Claude Code CLI, agentic task automation, LLM tooling pipelines

---

### EDUCATION

#### Bachelor of Science in Computer Science

Aug 2013 – May 2017

University of North Carolina at Chapel Hill • Chapel Hill, NC • GPA: 3.78

---

### EXPERIENCE

#### Senior Software Engineer

Mar 2025 – Present

Lowe's Companies, Inc. • Charlotte, NC

- Delivered a fully functional RFID receiving-bay POC within two weeks of conceptualization, independently designing the user flow, technical architecture, and demo experience. Included real-time EPC to UPC mapping, Kafka stream processing, item enrichment, and live visualization, directly influencing product roadmap decisions.
- Rebuilt the IoT configuration platform UI to enable business users to manage store configurations independently, transforming a previously developer-only tool and reducing support cycles.
- Served as sole UI developer on the modernization of a mainframe-based cycle count workflow; led requirement clarification, facilitated a half-day war room session with business stakeholders, and delivered early demos recognized positively by the Senior Product Manager and VP.
- Implemented Digital Twin integrations (BabylonJS) for multiple IoT POCs and built a custom 2D spatial visualization tool from scratch to support RFID lab testing, unblocking the team's ability to explore new use cases without delay.
- Championed AI-assisted development tooling and Snyk MCP automation workflows; independently mastered both and taught the broader team, significantly reducing vulnerability resolution time and contributing to enterprise-wide productivity metric testing.
- Provided cross-team architectural and frontend guidance to a sister team during their lead's absence, maintaining their delivery velocity through regular PR reviews and technical mentorship.

## **Vice President – Software Engineer III**

Feb 2022 – Mar 2025

*Bank of America • Charlotte, NC*

- Led a team of frontend developers delivering a cybersecurity operations platform used by 100+ security analysts to research and respond to network threats, built with React and Tailwind CSS.
- Transitioned an on-premises POC to a fully containerized, automated deployment on the OpenShift Container Platform, eliminating manual release friction and improving reliability.
- Implemented a robust CI/CD pipeline to ensure consistent, high-quality feature releases across all environments.
- Established thought leadership in frontend technologies through internal presentations, mentoring, and best-practice evangelism.
- Recognized with a Platinum Award for successfully delivering the cybersecurity platform to production within the fiscal year.

## **Full Stack Developer**

Nov 2021 – Feb 2022

*TBOL Inc. • Charlotte, NC*

- Served as a full stack developer on an agile team building a next-generation global payments platform for The Bank of London.
- Implemented React/Redux UI components from design mockups and contributed to service and API layers.
- Built the foundation for a company-wide reusable component system using bit.dev, accelerating UI development velocity across teams.

## **Senior Consultant / Developer Consultant**

Jul 2017 – Oct 2021

*CapTech Ventures, Inc. • Charlotte, NC*

- Provided software development consulting across multiple large financial and healthcare clients, designing tailored solutions from requirements through delivery.
  - Led frontend development of a deposit exception processing engine at Bank of America using Angular 10, NG-ZORRO, and Akita; contributed to REST endpoints and backend services.
  - Served as lead frontend developer rewriting a foreign item reconciliation engine processing all foreign checks at Bank of America, using Angular 6, RxJS, and Spring Boot.
  - Collaborated on a financial healthcare record management system at Premier Inc. using Angular 6, Java, Spring, and Docker alongside a team of 11 developers.
-
